EYELASH DYE: A TRADITION

EYELASH DYE: A TRADITION

COMBINAL is one of the most famous eyelash dyes throughout the world. This dye is not only smudge and waterproof but soft and easy to apply to eyelashes and eyebrows.

The pure colours of COMBINAL eyelash dye (black, brown, light brown, blue-black, blue and light charcoal) appear within a short time (around 8 - 10 minutes). The surplus colour can be easily removed from the skin after treatment. Moreover, COMBINAL also stimulates the eyelash growth.

COMBINAL eyelash dye has the advantage to work very well on all the different eyebrow and eyelash hair types. The various dyes can be mixed together to create a special colour according to personal preferences. Light charcoal and light brown dyes should be used only on the eyebrows to make the colour uniform.

Eyebrow dying should not be as intense as eyelash dying. Thus, we recommend to leave on the colour for 4 - 5 minutes. If the eyebrows are dyed with COMBINAL, it is possible to create shape by dying the skin. The same is possible for the eyelashes to obtain an eyeliner effect.

COMBINAL

COMBINAL

EYELASH DYE

COMBINAL Eyelash Dye is an oxidation tint, which needs to be mixed with hydrogen peroxide in order to impart a permanent colour. This water-resistant and smudge proof tint is excellent for lashes, eyebrows and other body hair leaving a beautiful, enhancing colour that can last up to 7-8 weeks.

The pure colours **BLACK**, **BLUE-BLACK**, **BLUE**, **BROWN**, **LIGHT BROWN** and **LIGHT CHARCOAL** can be mixed to create your own custom colours.

You have at your disposal an open palate of colour choices ready to be discovered!

DIRECTIONS:

- 1 Gently wash hair and skin using the COMBINAL cleanser. Rinse with lukewarm water and dry well.
- 2 Apply the COMBINAL skin protection cream.
- 3 Mix the hair colour with COMBINAL 5% hydrogen peroxide solution (2 cm cream and 5 drops of hydrogen peroxide).
- 4 For the best skin protection, take 2 protective COMBINAL eyelash pads, apply a thin film of skin protection cream on one pad and stick the two pads together. Apply a thin layer of the protection Cream under one eye (directly on the skin) before laying the double pad on the layer of cream. Repeat the process for the protection of the other eye. These protective pads help prevent unwanted colour stains getting on the skin during the colour process.
- 5 Apply the colour with a brush or a stick.
- 6 After approximately 8-10 minutes, carefully remove the dye by gently wiping the residual colour onto the protective eyelash pads using a brush or a stick. Eyebrow dyeing should not be as intense as eyelash dyeing therefore the colour should be left on for only 4 - 5 minutes. Remove the protective pads and rinse off the remaining colour with cold water.
- 7 Use COMBINAL Colour Cleanser to remove stains from the skin.

COMBINAL

HYDROGEN PEROXIDE

5% STABILIZED IN LIQUID FORM

Using COMBINAL hydrogen peroxide 5% when blending two tint products together produces the perfect consistency that will prevent product from needlessly entering the eyes.

Hydrogen peroxide 5% is stabilized in liquid form, which means that it proves to be more long lasting than standard hydrogen peroxides.

The bottle should be always kept tightly closed after use. This hydrogen peroxide should not be exposed to high temperatures, since the solution tends to expand in contact with the warmth.

Hydrogen peroxide 5% conforms to all the transport regulations.

DIRECTIONS:

Mix the COMBINAL dye with 5% hydrogen peroxide solution (2 cm cream and 5 drops of hydrogen peroxide).

EYELASH CLEANSER

This is the perfect cleanser for eyelids, eyelashes, eyebrows and skin. This gentle cleanser is excellent to clean and prepare the skin before the colour process.

After using the cleanser, the dye will be able to better penetrate the hair, resulting in a more intense long-lasting colour.

This cleanser can also be used as a daily eyelash cleanser.

DIRECTIONS:

Moisten a cotton pad with COMBINAL Eyelash Cleanser and gently dab hair and skin. Rinse with lukewarm water and dry well.

COMBINAL

COLOUR CLEANSER

COMBINAL Colour Cleanser is a hair colour stain remover, which gently removes any stains on the skin which may have occurred during the colour process.

DIRECTIONS:

Immediately after the colour process, moisten a cotton pad with COMBINAL Colour Cleanser and gently rub the dye off. Rinse with lukewarm water and dry well.

SKIN PROTECTION CREAM

This Skin Protection Cream is used to protect the skin during the eyelash and eyebrow colour process.

COMBINAL Protection Cream can also be used to protect the hands.

The main ingredients of this product are:

GLYCERINE (improves the skin's moisture retention, smoothing) and **VASELINE** (holds moisture).

DIRECTIONS:

For the best skin protection, take 2 protective eyelash pads, apply a thin film of COMBINAL skin protection cream on one pad and stick the two pads together. Apply a thin layer of this protection cream under one eye (directly on the skin) before laying the double pad on the layer of cream.

Repeat the process for the protection of the other eye.

COMBINAL

KIT

COMBINAL KIT contains all the products, which are required to dye eyebrows and eyelashes.

This KIT is perfect for all the users, who need a less amount of dye or for mobile beauticians.

A KIT CONTAINS:

- 1 Tube (Black, Blue, Blue-Black, Brown, Light Brown or Light Charcoal),
- 1 Combial 5% hydrogen peroxide (stabilized in liquid form),
- 1 brush
- 1 mixing dish to mix the colours.

KIT

HAIR DYE FOR PRIVATE BODY PARTS

Similarly to the original COMBINAL KIT, COMBINAL KIT for private body parts contains all the products, which are required to dye beards, sideburns and other hair types like intimate hair.

A KIT CONTAINS:

- 1 Tube (Black, Blue, Blue-Black, Brown, Light Brown or Light Charcoal),
- 1 Combial 5% hydrogen peroxide (stabilized in liquid form),
- 1 brush
- 1 mixing dish to mix the colours.

COMBINAL

BRUSH

Two different brushes can be used to apply the tint:

BRUSH:

A stiff-bristled brush; ideal to apply the dye on eyelashes, eyebrows, beards and other body hair.

MASCARA BRUSH:

An eyelash brush; ideal to apply the dye on eyelashes.

MIXING DISH

Two different mixing dishes to mix the colours:

GLASS MIXING DISH:

easy to use and always reusable.

PLASTIC MIXING DISH:

for one use.

EYELASH PADS

The COMBINAL Eyelash Pads are smooth pads, which specifically protect the sensitive area of eyes during the colour process.

Content: 96 pads

DIRECTIONS:

For the best skin protection, take 2 protective eyelash pads, apply a thin film of skin protection cream on one pad and stick the two pads together. Apply a thin layer of the protection cream under one eye (directly on the skin) before laying the double pad on the layer of cream. Repeat the process for the protection of the other eye.

COMBINAL

FORTICILS

COMBINAL Forticils, a treatment gel for **STRONG**, **LONG** and **VOLUMINOUS** eyelashes and eyebrows, is the latest development coming forth from Dr. Temt Laboratories.

This exciting new treatment gel is a nourishing gel with the main ingredients silk-sericin (water soluble gummy protein), vitamin E (nourishing) and D-Panthenol (moisturizing).

The combination of these three main ingredients (silk sericin, D-Panthenol and vitamin E) regulates moisture and accelerates regeneration of eyebrows and eyelashes. Thus, the results in the colour and perming processes are increased for an excellent long lasting tint.

We recommend an application twice a day (mornings before applying make-up and evenings after cleansing) to maximize results in just 4 weeks. After applying **Forticils**, usual make-up will be intensified and valorized.

EYELASH PERM KIT

For quick seductively curled eyelashes: a seductive look begins with beautiful eyes!

A COMPLETE KIT CONTAINS:

- 2 x **cleansing lotions** 5 ml (for cleansing the eyelashes before using the perming lotion)
- 3 x **perming lotions** 5 ml (for a perfect curl)
- 3 x **fixing lotions** 5 ml (for maintaining the eyelash curl)
- 2 x **nourishing collagen lotions** 5 ml (for nourishing the eyelashes)
- 32 x preglued **small curlers** (for creating a tight curl)
- 32 x preglued **medium curlers** (for creating a medium curl)

COMBINAL
