Therapy couch for dialysis
and chemotherapy

Ideal for Dialysis, Chemotherapy or Blood Sampling

Seated position

Bed position, flat position

Trendelenburg and shock position

Relax position with infussion holder

THERAPY COUCH FOR DIALYSIS AND CHEMOTHERAPY

LENA a Therapy chair that represents a brand new technological advancement for the specific requirements of dialysis. Equipped with 4 electric motors, an easy-to-clean anatomic mattress and non-toxic, medical upholstery.

Upholstered in treated polyurethane, high density padding offering great comfort and durability.

The motors, the home position and the 2 memories totally programmable can assume any position and height. Due to these movements, the professional can carry out his work in complete comfort.

Upholstered armrests with raising/lowering synchronised with back rest, independently retractible.

The proximity to floor level and the removable armrests provide ease of access for the patient.

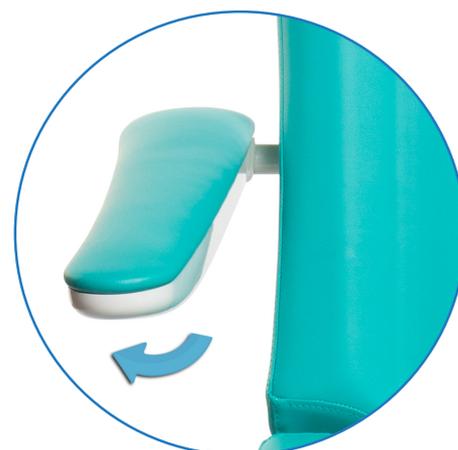

Legrest with feet support, retractible, with gas spring controlled high and low system.

Stable, safe and functional chassis.

Optimum designed base allowing ease of access from any angle.

ARMRESTS

For every specialty the perfect solution: armrests that rotatable and can be folded upwards, optional armrests that tiltable or armrests with height adjustment.

HAND CONTROL CHAIR

Simple operation, internationally understandable symbols; keys for basic settings for seated, relaxation, flat bed and Trendelenburg positions.

It is equipped with two independent memories to recall the stored positions, plus the return to the initial home position button.
